List of Figures	vii
List of Tables	ix
List of Algorithms	xi
List of Symbols and Abbreviations	xiii
<b>1 Introduction</b>	<b>1</b>
1.1 Background	1
1.2 Motivation and Approach	2
1.3 Relevance to Science and Practice	4
<b>2 Logistics of Forwarding Agencies</b>	<b>7</b>
2.1 Information about the Freight Forwarding Industry	7
2.2 Transport Networks, Terms and Facilities	9
2.3 Planning Tasks and Problems	19
<b>3 State of the Art of Science and Technology</b>	<b>23</b>
3.1 Technology and Traffic	23
3.1.1 Retrieval and Forecast of Travel Time Data	24
3.1.2 Existing Decision Support Systems	28
3.2 Classification of Routing Problems	30
3.2.1 Traveling Salesman Problem	30
3.2.2 Vehicle Routing Problem	32
3.2.3 Pickup and Delivery Problem	34
3.2.4 A Priori Optimization	36
3.2.5 Dynamic Optimization	39
3.2.6 Interesting Concepts besides the Classical Routing	43
3.3 Time Dependent Routing	44
3.4 Dynamic Customer Orders	49
3.5 Time Dependent and Dynamic Customers	54
<b>4 Formulation of the Mathematical Optimization Model</b>	<b>57</b>
4.1 Optimization Task	57

4.2	Derivation of Performance Indicators . . . . .	59
4.2.1	Modification of the Degree of Dynamism: Travel Times . . . . .	60
4.2.2	Modification of the Degree of Dynamism: Quantity demanded . . . . .	60
4.3	Mathematical Problem Formulation . . . . .	61
4.3.1	Integration of Time Depend Travel Times . . . . .	65
4.3.2	Integration of Unknown Customer Orders . . . . .	67
<b>5</b>	<b>Development of an Integrated Solution Approach</b>	<b>69</b>
5.1	Profitability of Dynamic Routing . . . . .	71
5.2	Analysis of Appropriate Solution Concepts . . . . .	73
5.2.1	Column Generation . . . . .	73
5.2.2	Waiting Strategies . . . . .	77
5.2.3	Tabu Search . . . . .	79
5.3	Integration of Time Dependent Travel Times . . . . .	81
5.4	Clustering of Potential Customer Locations . . . . .	87
5.4.1	Anticipation Strategies . . . . .	87
5.4.2	Cluster Construction . . . . .	89
5.4.3	Developed Strategy and Implementation . . . . .	92
5.5	Combination of Time Dependent Travel Times and Customer Clusters . . . . .	96
<b>6</b>	<b>Computational Experiments</b>	<b>101</b>
6.1	Data Preparation . . . . .	101
6.2	Computational Analysis of Developed Concept . . . . .	104
6.2.1	Experiments With Artificial Test Data . . . . .	105
6.2.2	Experiments With Operational Data . . . . .	111
<b>7</b>	<b>Conclusion</b>	<b>115</b>
7.1	Discussion of Results . . . . .	115
7.2	Future Research . . . . .	117
	<b>Bibliography</b>	<b>119</b>
	<b>A Appendix</b>	<b>133</b>
	<b>Index</b>	<b>153</b>

# List of Figures

1.1	General approach to optimization problems . . . . .	4
1.2	Outline of the thesis . . . . .	5
2.1	Traffic development in Germany (Estimates as of 2010) . . . . .	8
2.2	General structure of a less-than-truckload freight network . . . . .	10
2.3	Layout of an exemplary transshipment center . . . . .	14
2.4	Less-than-truckload freight network . . . . .	15
2.5	Geographic segmentations of a short-distance service region . . . . .	18
2.6	Simultaneous pickup and delivery routes inside the short-distance service region . . . . .	19
2.7	Process chain in scheduling department of forwarding agencies . . . . .	20
2.8	Nominal oil price from the years 1970 to 2006 . . . . .	21
3.1	Travel time from point A to point B . . . . .	25
3.2	Time dependent travel time from point A to point B . . . . .	25
3.3	Step function (left side) and non step function (right side) . . . . .	26
3.4	Basic road traffic diagram . . . . .	28
3.5	Subtours (left side) and feasible solution (right side) . . . . .	32
3.6	Static routes (left side) and routes with varying travel times (right side) . . . . .	37
3.7	Static routes (left side) and real-time optimization with varying travel times (right side) . . . . .	39
3.8	Degree of dynamism with response time . . . . .	42
3.9	Optimization with time dependent travel times . . . . .	45
3.10	Optimization with static (left side) and dynamic customer orders (right side) . . . . .	50
3.11	Classification of dynamic models . . . . .	54
4.1	Optimization with static (left side) and time dependent travel times (right side) . . . . .	66
5.1	Research Concept (Kolb Cycle) . . . . .	70
5.2	Exemplary branch-and-bound tree . . . . .	75
5.3	Intelligent Planning System . . . . .	82
5.4	Exemplary illustration of (smoothed) time zones . . . . .	83
5.5	Number of traffic jams on all interstates over 168 hours (Monday to Sunday) . . . . .	84

---

5.6	Travel times zones in North Rhine-Westphalia within 24 hours . . . . .	85
5.7	Concept of fruitful regions . . . . .	88
5.8	Static vs. real-time optimization with unknown customers . . . . .	92
5.9	Customer clustering and implicit tour structure . . . . .	93
5.10	Static vs. combined optimization with travel times and customers . . . . .	97
6.1	Customer distributions of Solomon data sets . . . . .	102
6.2	Results of static vs. time dependent optimization after tabu search . . . . .	110
6.3	Customer distributions of operational data set i01 . . . . .	111
6.4	SWOT analysis of the developed approach . . . . .	114
A.1	Travel time interval vs. travel time (Monday to Friday) . . . . .	134
A.2	Number of traffic jams in 30 min for different reasons in 24 hours . . . . .	134
A.3	Number of traffic jams in 30 min for other reasons in 24 hours . . . . .	135
A.4	Number of traffic jams in 30 min on interstate A1 . . . . .	135

# List of Tables

2.1	Turnover of the “top 10” LTL companies or co-operations . . . . .	9
2.2	Time windows for loading and unloading operations . . . . .	12
2.3	Common handling units in the LTL industry . . . . .	16
2.4	Operating levels composing transport networks . . . . .	17
3.1	Velocity definitions of data providers and a producer of navigation systems	24
3.2	Overview of exemplary features of route planning software . . . . .	29
3.3	Classification of routing problems . . . . .	36
3.4	Comparison of the PDP and the TDPDP . . . . .	46
3.5	Comparison of time dependent approaches . . . . .	49
3.6	Comparison of dynamic routing approaches . . . . .	55
4.1	Attributes and parameter values . . . . .	58
5.1	Static vs. dynamic optimization . . . . .	72
5.2	Speed derivations of derived time zones . . . . .	85
6.1	Corresponding time zones in a planning horizon of 230 units . . . . .	103
6.2	Static (a) and time dependent (b) travel times (mR1) . . . . .	106
6.3	Dynamic customers (c) and dynamic customers with clusters (d) (mR1) .	106
6.4	Time dependent travel times and dynamic customers (e) and complete anticipation (f) (mR1) . . . . .	107
6.5	Static (a) and time dependent travel times (b) (mR2) . . . . .	107
6.6	Dynamic customers (c) and dynamic customers with clusters (d) (mR2) .	108
6.7	Time dependent travel times and dynamic customers (e) and complete anticipation (f) (mR2) . . . . .	108
6.8	Static (a) and time dependent travel times (b) (operational data) . . . . .	112
6.9	Dynamic customers (c) and dynamic customers with clusters (d) (opera- tional data) . . . . .	113
6.10	Time dependent travel times and dynamic customers (e) and complete anticipation (f) (operational data) . . . . .	113
A.1	Clusters (mR101d) . . . . .	136
A.2	Information about clusters (mR101d) . . . . .	136

---

A.3	Solomon instance R101 . . . . .	137
A.4	Modified Solomon instances mR101 . . . . .	137
A.5	Characteristics of new instances for the PDP . . . . .	137
A.6	Information about instances of type mR . . . . .	138
A.7	Information about instances of type mC . . . . .	138
A.8	Information about instances of type mRC . . . . .	138
A.9	Result overview mR1 and mR2 . . . . .	139
A.10	Result overview mC1 and mC2 . . . . .	142
A.11	Static and time dependent travel times (mC1 and mC2) . . . . .	145
A.12	Dynamic customers and dynamic customers with clusters (mC1 and mC2) . . . . .	146
A.13	Time dependent travel times and dynamic customers and complete anticipation (mC1 and mC2) . . . . .	146
A.14	Result overview mRC1 and mRC2 . . . . .	147
A.15	Static and time dependent travel times (mRC1 and mRC2) . . . . .	149
A.16	Dynamic customers and dynamic customers with clusters (mRC1 and mRC2) . . . . .	150
A.17	Time dependent travel times and dynamic customers and complete anticipation (mRC1 and mRC2) . . . . .	150
A.18	Operational data set i01 . . . . .	151
A.19	Industry instance and degree of dynamism . . . . .	151
A.20	Industry instance and degree of dynamism with 600 customers . . . . .	151
A.21	Result overview operational data . . . . .	152

# List of Algorithms

3.1	Tabu search algorithm . . . . .	47
5.1	Computation of time dependent travel times . . . . .	86
5.2	Agglomerative hierarchical clustering algorithm for the PDP . . . . .	95
5.3	Construction of initial solution . . . . .	98
5.4	Anticipatory tabu search for the PDP . . . . .	99
A.1	General branch-and-bound algorithm . . . . .	133
