
List of Content

Acknowledgement	i
Abstract	ii
Zusammenfassung.....	iii
List of Content.....	iv
List of Tables.....	viii
List of Figures.....	x
List of Abbreviations	xv
1 Research Context	1
1.1 General Research Motivation.....	1
1.2 The Problem and a Potential Solution	2
1.3 Research Proposition, Goal and Stakeholders	3
1.4 Dissertation Structure.....	4
2 Research Methodology	5
2.1 Nature of Systems.....	5
2.2 Systems Thinking	6
2.3 System Analysis and Synthesis	6
2.4 The Methodology.....	7
3 CBM and Condition Monitoring Fundamentals	8
3.1 Machinery Failure	8
3.2 Machinery Maintenance	9
3.3 Condition Based Maintenance.....	12
3.3.1 Role of Condition Monitoring Techniques in CBM	13
3.3.2 Role of Nondestructive Tests in CBM	15
3.3.3 Metering Methods in CBM	16
3.3.4 CMT/NDT Qualitative Benefits	17
3.4 Towards Establishing CBM Programs.....	19
4 The CBM Toolbox: A Systematics for CBM Management.....	22
4.1 Overture of the Toolbox	22
4.2 Structure of the Toolbox	23
4.3 Information Flows of the Tools	24
4.4 Utilization Procedure of the Toolbox	26
5 Statistical Failure Analysis for the CBM Toolbox	27
5.1 Time Based Failure Analysis.....	28
5.2 Station Based Failure Analysis.....	36
5.3 Object Based Failure Analysis	44
5.4 Problem Based Failure Analysis.....	50
5.5 Cause Based Failure Analysis	57
5.6 Statistical Problem Cause Analysis.....	64
5.7 Time Based Maintenance Analysis	65
5.8 Summary and Future Development Potentials.....	76

- 6 CMT/NDT Knowledgebase for the CBM Toolbox..... 78
 - 6.1 Knowledge Acquisition..... 78
 - 6.2 Acoustic Emission Testing..... 79
 - 6.2.1 Conception..... 79
 - 6.2.2 Tools and Techniques 80
 - 6.2.3 Use and Applicability 81
 - 6.2.4 Limitations and Pros 82
 - 6.3 Electrical Inspection 84
 - 6.3.1 Conception..... 84
 - 6.3.2 Tools and Techniques 88
 - 6.3.3 Use and Applicability 97
 - 6.3.4 Limitations and Pros 102
 - 6.4 Electromagnetic Testing..... 103
 - 6.4.1 Conception..... 103
 - 6.4.2 Tools and Techniques 105
 - 6.4.3 Use and Applicability 106
 - 6.4.4 Limitations and Pros 107
 - 6.5 Laser Inspection 107
 - 6.5.1 Conception..... 108
 - 6.5.2 Tools and Techniques 111
 - 6.5.3 Use and Applicability 114
 - 6.5.4 Limitations and Pros 120
 - 6.6 Leak Testing..... 121
 - 6.6.1 Conception..... 121
 - 6.6.2 Tools and Techniques 127
 - 6.6.3 Use and Applicability 136
 - 6.6.4 Limitations and Pros 140
 - 6.7 Magnetic Particle Testing..... 143
 - 6.7.1 Conception..... 143
 - 6.7.2 Tools and Techniques 144
 - 6.7.3 Use and Applicability 145
 - 6.7.4 Limitations and Pros 146
 - 6.8 Penetrant Testing 147
 - 6.8.1 Conception..... 147
 - 6.8.2 Tools and Techniques 150
 - 6.8.3 Use and Applicability 151
 - 6.8.4 Limitations and Pros 153
 - 6.9 Radiographic Testing..... 155
 - 6.9.1 Conception..... 155
 - 6.9.2 Tools and Techniques 164
 - 6.9.3 Use and Applicability 167
 - 6.9.4 Limitations and Pros 173

6.10	Stress Wave Analysis.....	177
6.10.1	Conception.....	177
6.10.2	Tools and Techniques.....	178
6.10.3	Use and Applicability.....	181
6.10.4	Limitations and Pros.....	183
6.11	Thermal Inspection.....	185
6.11.1	Conception.....	185
6.11.2	Tools and Techniques.....	188
6.11.3	Use and Applicability.....	191
6.11.4	Limitations and Pros.....	194
6.12	Tribological Testing.....	195
6.12.1	Conception.....	196
6.12.2	Tools and Techniques.....	200
6.12.3	Use and Applicability.....	222
6.12.4	Limitations and Pros.....	223
6.13	Ultrasonic Testing.....	224
6.13.1	Conception.....	225
6.13.2	Tools and Techniques.....	226
6.13.3	Use and Applicability.....	227
6.13.4	Limitations and Pros.....	229
6.14	Vibration Analysis.....	230
6.14.1	Conception.....	230
6.14.2	Tools and Techniques.....	234
6.14.3	Use and Applicability.....	235
6.14.4	Limitations and Pros.....	238
6.15	Visual/Optical Inspection.....	239
6.15.1	Conception.....	239
6.15.2	Tools and Techniques.....	240
6.15.3	Use and Applicability.....	241
6.15.4	Limitations and Pros.....	242
6.16	Summary and Future Development Potentials.....	243
7	Decision Support Tools for the CBM Toolbox.....	245
7.1	Selection of CMTs/NDTs.....	245
7.2	Financial Analysis Tool.....	246
7.3	CMT/NDT Selection Matrix.....	250
7.4	Summary and Future Development Potentials.....	255
8	Object Based Problem and Cause Analysis for the CBM Toolbox.....	256
8.1	Bearings.....	257
8.1.1	Plain Bearing.....	257
8.1.2	Rolling Bearing.....	257
8.2	Compressors.....	259
8.2.1	Centrifugal Compressor.....	259
8.2.2	Rotary Compressor.....	260
8.2.3	Reciprocating Compressor.....	261

8.3	Control Valves	262
8.3.1	Manually Actuated Control Valve.....	262
8.3.2	Automatically Actuated Control Valve	263
8.4	Conveyors.....	264
8.4.1	Chain Type Conveyor	265
8.4.2	Roller Type Conveyor	266
8.4.3	Pneumatic Conveyor	267
8.5	Fans.....	268
8.5.1	Centrifugal Fan	268
8.5.2	Axial Fan.....	269
8.6	Gear Systems.....	270
8.7	Pumps.....	272
8.7.1	Centrifugal Pump.....	272
8.7.2	Rotary Pump	273
8.7.3	Reciprocating Pump.....	274
8.8	Summary and Future development Potentials	276
9	Sample Application	277
9.1	Use of the Statistical Failure Analysis	277
9.2	Use of the CMT/NDT Knowledgebase	280
9.3	Use of the Decision Support Tools.....	281
9.4	Use of the Object Based Problem and Cause Analysis	284
10	Summary and Prospect	285
10.1	Review of the CBM Toolbox	285
10.2	Concluding Remarks	286
10.3	Summary of Contributions	287
10.4	Suggested Future Work.....	289
	References.....	290
	Web Sources.....	I
	Appendix A - Material Failure and Defect.....	III
	Appendix B - Fault Detection, Diagnostics and Prognostics	XIII
	Appendix C - Utilization of CBM in Industry.....	XVII
	Appendix D - CMTs/NDTs ADAD Overview	XIX
	Appendix E - CMTs/NDTs Technical Advancements	XXVI
