
Table of contents

List of abbreviations	XI
List of figures	XIII
List of tables	XV
1 Introduction to the research	1
1.1 Research background	1
1.2 Research problem and -objective	3
1.3 Research questions	4
1.4 Research methodology	5
1.5 Research structure	5
2 Basic description of the field of action	9
2.1 Risks, supply chain and its management	9
2.1.1 Risks	9
2.1.2 Risk management	9
2.1.3 Supply chain	10
2.1.4 Supply chain management	11
2.1.5 Supply chain risks	11
2.1.6 Drivers and trends for supply chain risks	13
2.1.7 Supply chain risk management	13
2.2 (Supply-) risk management and its procedure	15
2.2.1 (Supply-) risk management	15
2.2.2 Step 1: Risk identification	16
2.2.3 Step 2: Risk assessment	17
2.2.4 Step 3: Risk mitigation	18
2.2.5 Step 4: Risk monitoring	19
2.3 Supply risks and appropriate supply risk types	20
2.3.1 Supply risks	20
2.3.2 Environmental risks	21
2.3.3 Financial risks of a buyer-supplier relationship	22
2.3.4 Operational risks of a buyer-supplier relationship	22
2.3.5 Strategic risks of a buyer-supplier relationship	22
2.4 Data processing - chances and boundaries	23
2.4.1 Data and its processing	23
2.4.2 Data and its processing on the supply chain level	24
2.4.3 Data and its processing on the corporate level	25
	VII

2.4.4	Data processing in a digitized production environment	25
2.4.5	Discrepancy between the potential- and actual level of data processing	26
2.4.6	Potential of data processing for risk management	27
2.5	Interim summary	27
3	Research methodology presented with the research onion	29
3.1	Research philosophy – Focus the practical outcome of the research (Pragmatism)	30
3.1.1	Overview on research onion related research philosophies	30
3.1.2	Research philosophy orientation for the research of this dissertation	31
3.2	Research approach – Using existing input to create value (Abduction, Induction)	32
3.2.1	Overview on research onion related research approaches	32
3.2.2	Research approach orientation for the research of this dissertation	33
3.3	Methodological choice – Execution of mono methods (qualitative & quantitative)	34
3.3.1	Overview on research onion related methodological choices	35
3.3.2	Methodological choice orientation for the research of this dissertation	36
3.4	Research strategy – Problem driven research (Archival research/Design science)	36
3.4.1	Overview on research onion related research strategies	37
3.4.2	Research strategies for the research of this dissertation	38
3.5	Time horizon – Snapshot of the status quo (Cross-sectional studies)	39
3.5.1	Overview on research onion related time horizons	39
3.5.2	Time horizon for the research of this dissertation	40
3.6	Techniques and procedures – Collection of available data (secondary/primary)	40
3.6.1	Overview on research onion related techniques and procedures	41
3.6.2	Techniques and procedures for the research of this dissertation	41
3.7	Research ethics – Considering all appropriate ethic principles	42
3.7.1	Overview on research onion related research ethics	42
3.7.2	Research ethics for the research of this dissertation	43
3.8	Research reliability and -validity – High transparency for reconstruction	43
3.8.1	Overview on research onion related research reliability and -validity	43
3.8.2	Research reliability and -validity for the research of this dissertation	44
3.9	Interim summary	45
4	Development of procedures recommended for risk management and data processing	47
4.1	Research A: Identification of variables for successful supply risk identification, -mitigation and – monitoring	47
4.1.1	Systematic literature review for underlining the research gap	47

4.1.2	Archival research – Input from a World Café workshop and survey for deriving and prioritizing variables	50
4.1.3	Data analysis - Conducting necessary condition- & stepwise regression analysis	53
4.1.4	Interim research results – outcome of the archival research and data analysis	56
4.1.5	Result summary – necessary- and/or sufficient variables for successful risk identification, -mitigation and -monitoring	59
4.2	Research B: Developing an application-specific selection procedure for risk assessment methods	61
4.2.1	Systematic literature review on risk assessment	61
4.2.2	Reviewing existing literature reviews regarding risk assessment	64
4.2.3	Classification criteria for risk assessment methods: General overview	67
4.2.4	Method categorization in three detail levels based on method characteristics	67
4.2.5	Allocation of assessment elements to the given methods/ method groups	71
4.2.6	Derivation of application criteria to enable a practice-oriented evaluation	73
4.2.7	Using optional specifications for an increased individualization	78
4.2.8	Application-specific selection procedure	80
4.3	Research C: Developing a prioritization approach for data processing obstacles	83
4.3.1	Systematic literature review on data processing obstacles	84
4.3.2	Identified obstacles for data processing	87
4.3.3	Categorization of the data processing obstacles	93
4.3.4	Evaluation criteria for data processing obstacles	96
4.3.5	Identification of suitable method elements based on its requirements	99
4.3.6	Development of the prioritization procedure for data processing obstacles	100
4.4	Interim summary	105
5	Validation of the developed procedures	107
5.1	Research A: Validation of the data set of the survey	108
5.2	Research B: Validation by an exemplary implementation in practice	108
5.3	Research C: Validation by an exemplary implementation in practice	111
5.4	Interim summary	120
6	Conclusion and recommendation for future research	127
6.1	Answers to the research questions	127
6.2	Theoretical- and managerial implications	129
6.3	Research limitations and future research	131
	References	135
	Appendix	157
